 Don Rainey, a regional specialist agent water resources, and Golmar Golmohammadi, professor at the research center, explained that people are affecting the environment and offered tips to the youngsters on how they can contribute to protect and save the environment. 'Now I know how to prevent pollution,' said Harper Manning, 11.

MOOTIVATING YOUNG MINDS

J.K. Yarborough, extension agent at UF IFAS at Orange County, told Jase Snell, Colton Dakin and Jackson Widner about nutrients at a youth field day last Thursday (June 30) at the UF/IFAS Range Cattle Research & Education Center in Ona.

Brent Sellers, director of the UF/IFAS Range Cattle Research & Education Center, explains the importance of taking care of plants. He said that we can have more native plants but once the plants become invasive they stay that way forever unless something is done about it.

Shannon Minger is playing a similar game to 'musical chairs' -- but with a twist. The point was to not land on a note with the name of an invasive plant.

What's happening downtown?
