COURSE DESCRIPTION AND STATEMENT OF GENERAL EDUCATION PURPOSE:

The wetland seminar series is a forum where presentations focus on water, wetlands and watershed issues both locally, nationally and internationally. Presentations typically cover a wide range of interdisciplinary topics associated with water including hydrology, biogeochemistry, soils, wildlife, vegetation, restoration and policy issues. Presenters are often existing or previous students and faculty, but also include staff and scientists from state and federal agencies, local consultants and other professionals. The seminar is offered as a one credit course through the Soil and Water Science Department or Environmental Engineering Sciences.

STUDENT LEARNING OBJECTIVES:

- Understand current issues and research being conducted in the area of water, wetlands and watersheds.
- Experience a science based forum for the exchange of research findings and debate.
- Compile and summarize a presentation into a concise scientific abstract.
- Critically evaluate and question if necessary research methods and findings of presenters.

COURSE FORMAT: Weekly seminar presentations will be presented, recorded and then posted to Canvas and made available through e-Learning. Each week students will be required to summarize the presentation in the form of an “abstract” and either submit that abstract in typed hardcopy the following week or upload electronically to the Canvas website.
