COURSE DESCRIPTION AND STATEMENT OF GENERAL EDUCATION PURPOSE:

The wetland seminar series is a forum where presentations focus on water, wetlands, and watershed issues both locally, nationally and internationally. Presentations typically cover a wide range of interdisciplinary topics associated with water including hydrology, biogeochemistry, soils, wildlife, vegetation, restoration, and policy issues. Presenters are often existing or previous students and faculty, but also include staff and scientists from state and federal agencies, local consultants, and other professionals. The seminar is offered as a one credit course through the Soil and Water Science Department or Environmental Engineering Sciences.

STUDENT LEARNING OBJECTIVES:

- Understand current issues and research being conducted in the area of water, wetlands and watersheds.
- Experience a science-based forum for the exchange of research findings and debate.
- Compile and summarize a presentation into a concise scientific abstract.
- Critically evaluate and question, if necessary, research methods and findings of presenters.

COURSE FORMAT: Weekly seminar presentations will be presented, recorded and then posted to Canvas or YouTube channel. Each week students will be required to summarize the presentation in the form of an "abstract" and submit that abstract electronically to the Canvas website.

GRADING: Overall grade will be determined based on a student's performance in the following categories:

Attendance	50 %
Summary Abstract	50 %

Attendance “Attendance” is required for the course and will be determined either based on a signature on the sign in sheet that is circulated during the seminar on campus or based on abstract submittal for DE students.

Summary Abstract – Weekly abstracts that summarize the presentation will be graded based on a grading rubric that will include conciseness, clarity, accuracy, and completeness.
