SOIL QUALITY (SWS 6134)

3 Credits- Fall 2020

INSTRUCTOR: Dr. Zhenli L. He, Professor
University of Florida, IFAS, Indian River Research and Education Center, 2199 South Rock Road, Fort Pierce, FL34945
Tel 772-971-5854; E-mail: zhe@ufl.edu

COURSE OBJECTIVES: To acquaint students with basic concepts, principles, components, measurements, and evaluation of soil quality and its management for sustainable agriculture. Soil quality is the capacity of the soil to function within the ecosystem boundaries to sustain biological productivity, maintain environmental quality, and promote plant and animal health. In this course, state-of-the-art studies on soil quality and the principles, assessment and management of soil quality are examined with respect to biological production, plant and animal health, food security, and environmental quality. After studying this course, the students should be able to understand basic principles of soil quality and to analyze and evaluate soil quality related to agricultural production and environmental quality.

DELIVERY METHOD: E-Learning System/Canvas and Audio lectures (with powerpoint presentations and reading materials)

FREQUENCY: Fall semester, every even year

TARGET STUDENTS: Graduate students who wish to become specialists in the management of nutrients, soils, agroecosystems, and environmental quality.

CLASS ATTENDANCE: Attendance of chat sessions is mandatory. There is 5% grade for chat room participation.

CHAT ROOM SESSION: Chat room session is scheduled 5-7 PM every Monday except for public holidays.

GRADING:

- Homework: 30%
- Chat room attendance: 5%
- Mid-term Examination: 20%
- Review or research
- Paper / presentation: 20%
- Final Examination: 25%
There will be no make-up homework and exams. Late submission of assignments will result in reduced credit (10% per assignment) if it is not agreed upon in advance.

ASSIGNMENTS/EXAMS/PROJECTS/LECTURES

Soil quality is one of the rapidly-developing frontiers in soil and environmental sciences, with emphasis on soil’s functions in plant and animal production, food safety, and environmental quality. This course involves many new concepts, principles, evaluation expertise, and test methods. It is important that the students have a good understanding of the concepts and principles. Therefore, in addition to lectures, the students will be also provided with supplementary course materials to read and homework to do at the end of each chapter. The students are required to submit homework report timely in order to obtain scores. The mid-term examination is designed to check the study progresses of each student so that some adjustment can be made based on student’s performance. In addition, each student is required to conduct an independent soil quality evaluation project. For this project, students will select one of the soil quality related study areas (crop production-, animal production-, food safety-, environmental quality (water quality/air quality)-oriented soil quality issue), conduct a literature review based on journal articles, textbook chapters, and/or proceeding papers, discuss the characteristics of the concept/approach, its limitations, and benefits, submit a report, and present results of their independent study.
REFERENCES: Reference books, journal articles, and related information links are provided on course website and in disk (some references are listed at the end of this syllabus).

PREREQUISITES: Soil Science for Environmental Professionals (SWS 5050).

OFFICE HOURS
INSTRUCTOR: Open for e-mail and phone call at any time or chat room by appointment.

COURSE MODULES
1. Concepts, principles, and components of soil quality
   1.1. Definition and concepts of soil quality
   1.2. Soil components and basic soil quality properties
   1.3. Soil quality indicators
2. Methods of soil quality evaluation
   2.1. Soil quality assessment
   2.2. Measurements of soil quality indicators
3. Management of soil quality for agriculture and environmental quality
   3.1. Soil quality management for plant production
      3.1.1. Soil quality factors
      3.1.2. Processes and management
   3.2. Management of soil quality for the environment
      3.2.1. Water quality
      3.2.2. Air quality
4. Management of soil quality for health and food security
   4.1. Soil quality management for plant health
   4.2. Soil quality management for animal health
   4.3. Soil quality management for human health and food security

GRADES AND GRADE POINTS: For information on current UF policies for assigning grade points, see https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx

ABSENCES AND MAKE-UP WORK: Requirements for class attendance and make-up exams, assignments and other work are consistent with university policies that can be found at: https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx

ACADEMIC HONESTY: As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.” You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment.” It is assumed that you will complete all work independently in each course unless the instructor provides explicit permission for you to collaborate on course tasks (e.g. assignments, papers, quizzes, exams). Furthermore, as part of your obligation to uphold the Honor Code, you should report any condition that facilitates academic misconduct to
appropriate personnel. It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For more information regarding the Student Honor Code, please see: http://www.dso.ufl.edu/sscr/process/student-conduct-honor-code

**STUDENT RESPONSIBILITIES:** Students should report any condition that facilitates dishonesty to the instructor, department chair, college dean or Student Honor Court. More information about student responsibilities are available from the current University catalog, online at: http://www.registrar.ufl.edu/catalog1011/policies/students.html

**SOFTWARE USE:** All faculty, staff, and students of the University of Florida are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

**CAMPUS RESOURCES:**

**Health and Wellness**

U Matter, We Care:
If you or a friend is in distress, please contact umatter@ufl.edu or 352 392-1575 so that a team member can reach out to the student.

Counseling and Wellness Center:
http://www.counseling.ufl.edu/cwc/Default.aspx, 392-1575;

Sexual Assault Recovery Services (SARS)
Student Health Care Center, 392-1161.

University Police Department, 392-1111 (or 9-1-1 for emergencies).
http://www.police.ufl.edu/

**Academic Resources**

E-learning technical support, 352-392-4357 (select option 2) or e-mail to Learning-support@ufl.edu. https://lss.at.ufl.edu/help.shtml.

Career Resource Center, Reitz Union, 392-1601. Career assistance and counseling.
http://www.crc.ufl.edu/

Library Support, http://cms.uflib.ufl.edu/ask. Various ways to receive assistance with respect to using the libraries or finding resources.
Teaching Center, Broward Hall, 392-2010 or 392-6420. General study skills and tutoring.
http://teachingcenter.ufl.edu/

Student Complaints Campus: https://www.dso.ufl.edu/documents/UF_Complaints_policy.pdf
STUDENTS WITH DISABILITIES: The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues. Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

ONLINE COURSE EVALUATION: Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at https://gatorevals.aa.ufl.edu/students/. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via https://ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students at https://gatorevals.aa.ufl.edu/public-results/.

STUDENT COMPLAINTS: Each online distance learning program has a process for, and will make every attempt to resolve, student complaints within its academic and administrative departments at the program level. See http://distance.ufl.edu/student-complaints for more details.

PRIVACY STATEMENT OF RECORDED MATERIALS
Our class sessions may be audio visually recorded for students in the class to refer back and for enrolled students who are unable to attend live. Students who participate with their camera engaged or utilize a profile image are agreeing to have their video or image recorded. If you are unwilling to consent to have your profile or video image recorded, be sure to keep your camera off and do not use a profile image. Likewise, students who un-mute during class and participate orally are agreeing to have their voices recorded. If you are not willing to consent to have your voice recorded during class, you will need to keep your mute button activated and communicate exclusively using the "chat" feature, which allows students to type questions and comments live. The chat will not be recorded or shared. As in all courses, unauthorized recording and unauthorized sharing of recorded materials is prohibited.

| Communication         |                                                                                |                                 |                                 |                                    |            |
|-----------------------|-------------------------------------------------------------------------------|                                 |                                 |                                    |            |
| Organization          | No logical structure of the paper and presentation.                           | The paper and presentation is structured in a way but hard to follow. | The paper and presentation is logically structured. | Well organized with proper proportions of text, figures, and pictures. |            |
| Language              | Poor with many errors in grammar and spelling.                                | Adequate with minor errors in grammar and spelling         | Written clearly without obvious errors in grammar and spelling | Well written with good flow of ideas and easy to follow |            |
| Colors & figures      | Colors are arbitrarily chosen and figures are poorly designed.               | Use of some colors and figures to present information.     | Colors and figures are used to enhance presentation. | Colors and figures are well designed to communicate ideas. |            |
| Presentation          | Not clear and timely                                                          | Good speech but not timely                                      | Good speech and timely            | Well presented and timely          |            |
| Acknowledgment        | Minimal citation                                                              | With some citations and references                             | Completely cited and acknowledged. | Well cited and acknowledged with journal standards |            |
Chapter 1. Definition and Concepts

1.1. What is soil quality?

Soil quality is the capacity of the soil to function within the ecosystem boundaries to sustain biological productivity, maintain environmental quality, and promote plant and animal health (Soil Sci. Soc. Am, 1997). Soil quality is a measure of the conditions of soil relative to the requirement of one or more species and/or to any human need or purpose (Johnson et al., 1997; Lal, 1997; Doran et al., 1998). Soil quality consists of physical, chemical, and biological components.

1.2. Why do we need soil quality concept?

The importance of developing the concept of soil quality was enhanced because of the need to apply soil science to address the problems of nonagricultural uses of soil (e.g., mineland restoration, urban uses and disposal of urban wastes, soil contamination and pollution by industrial activities, athletic and recreational uses of soil, and environmental regulatory functions with particular reference to water quality and the greenhouse effect). A strong need, therefore, arose to develop appropriate indicators of soil quality in relation to specific soil function (e.g., agricultural, urban, industrial, recreational, athletic, environmental, and waste disposal).

1.3. How do we evaluate soil quality?

1.4. What are the potential applications of soil quality in agriculture, food and environment?

Chapter 2. Soil Components and Basic Soil Quality Properties

2.1. Soil development and quality changes

2.2. Soil components

2.2.1. Inorganic components

Primary minerals
Clay minerals
Oxides

2.2.2. Organic components

Organic matter
Humus
Soil organisms

2.3. General soil quality attributes

2.3.1. Soil texture
2.3.2. Soil reactions
2.3.3. Soil charges
Chapter 3. Soil Quality Indicators
3.1. What are soil quality indicators?
3.2. Physical indicators
3.3. Chemical indicators
3.4. Biological indicators

Chapter 4. Soil Quality Assessment
4.1. The need of soil quality assessment
4.2. Approaches of soil quality assessment
4.3. Procedures of soil quality assessment
4.4. Site selection
4.5. Identification of soil quality attributes
4.6. Soil quality indexing

Chapter 5. Measurements of Soil Quality Indicators
5.1. Soil sampling
5.2. Physical Parameters
   Soil texture
   Depth of soil and rooting
   Soil bulk density and filtration
   Water holding capacity
   Water retention characteristics
   Water content
5.3. Chemical Parameters
   Total organic C and N
   pH
   Electrical conductivity
   Labile nutrients and metals
   Labile contaminants
5.4. Microbiological and Biochemical Parameters
   Microbial biomass C and N
   Potentially mineralizable N
   Soil respiration
   Enzyme activity
   Microbial quotient
   Microbial respiration quotient

6.1 Plant nutrients
6.2 Nutrient availability
6.3 Chemical quality factors
6.4 Biological quality factors
Chapter 6. Soil Quality Management for Plant Production: Part II. Processes and management

6.5 Objectives of soil quality management
6.6 Management strategies
6.7 Management criteria
6.8 Land use and soil quality
6.9 Soil quality indexing of plant production
6.10 Soil erosion
6.11 Quality restoration of eroded soils
6.12 Soil acidification
6.13 Quality improvement of acid soils

Chapter 7. Management of Soil Quality for the Environment: Water Quality
7.1 Soil and water quality relationship
7.2 Nutrient and contaminant transport and surface water quality
7.3 Surface runoff and leaching
7.4 Phosphorus cycle
7.5 Soil biogeochemistry of phosphorus
7.6 Phosphorus management for water quality
7.7 Nitrogen cycle
7.8 Ammonia volatilization
7.9 Nitrate leaching and ground water quality
7.10 Nitrogen management for water quality
7.11 Heavy metals and pesticides

Chapter 8. Soil Quality Management for Air Quality
8.1 Greenhouse effects and soil quality
8.2 Soil carbon pools
8.3 Soil carbon sequestration
8.4 Conservation reserve program and carbon sequestration
8.5 Nitrogen emissions
8.6 Soil nitrogen losses and soil quality
8.7 Soil quality management to reduce nitrogen losses

Chapter 9. Soil Quality Management for Plant Health
9.1 Nutrient need for healthy plants
9.2 Nutrient deficiencies
9.3 Plant toxicity
   Al, Mn and Fe
   Heavy metal
9.4 Water stresses
   Water supplying conditions
   Flooding effects
9.5 Other soil constraints for plant Health
9.6 Optimal fertilization and irrigation
9.7 Soil quality evaluation for plant health

Chapter 10. Soil Quality Management for Animal Health
10.1 Essential elements for animal health and growth
10.2 Forage quality and animal production
10.3 Nutrient imbalance
10.4 Toxic effects of heavy metals
10.5 Other contaminants
10.6 Soil quality evaluation for animal health

Chapter 11. Soil Quality Management for Food Security
11.1 Food chain principles
11.2 Human nutrition and food
11.3 Food chain contamination: heavy metals and pesticides
11.4 Micro-nutrients, from soil to food
11.5 Soil quality management of quality food production
11.6 Soil quality evaluation for food security
