

NANOTECHNOLOGY IN FOOD, AGRICULTURE AND ENVIRONMENT (AGG 4502)

3 Credits- Every Spring

INSTRUCTOR: Dr. Zhenli L. He, Professor
University of Florida, IFAS, Indian River Research and Education Center,
2199 South Rock Road, Fort Pierce, FL. 34945
Tel 772-577-7353 Fax 772-468-5668
E-mail: zhe@ufl.edu

CATALOG DESCRIPTION:

Application of nanotechnology in crop production, food processing and preservation, and environmental remediation; behavior of engineered nanoparticles in plant, soil and the environment, and environmental toxicology and regulations of engineered nanoparticles.

PRE-REQUISITES/CO-REQUISITES:

Basic knowledge in soil sciences, environmental sciences, or equivalent courses in the related fields;
SWS 3022 – Intro to Soils in the Environment

COURSE OBJECTIVES:

This course will cover the fundamentals of nanoscience and nanotechnology, application of nanotechnology in crop production, food processing and preservation, and environmental remediation; behavior of engineered nanoparticles in plant, soil and the environment, and environmental toxicology and regulations of engineered nanoparticles.

- Understand basic concepts, principles, and components of nanotechnology. At the end of the course all students will be able to describe basic theory of nanoscience and nanotechnology.
- Learn skills in the creation and characterization of nanomaterials. At the end of the course all students will be familiar with methods for characterizing important properties of nanomaterials commonly used in agriculture and the environment.
- Familiar with application of nanotechnology in agriculture, food, and environment. At the end of the course all students will be able to apply nanotechnology to solve some problems in the fields of food, agriculture, and environment.
- Gain knowledge in toxicology of engineered nanoparticles (EPs) and current methods of assessment. At the end of the course all students will be able to understand potential impact of EPs and conduct simple environmental risk assessment.

DELIVERY METHOD: Online-Canvas E-Learning System and audio/video lectures (with powerpoint presentations and reading materials)

OFFICE HOURS: Open for e-mail and phone call at any time or chat room by appointment.

FREQUENCY: Spring semester, every year

TARGET STUDENTS: Undergraduate students who wish to expand their knowledge in emerging sciences and become a specialist in food, agriculture, and environment.

CLASS ATTENDANCE: Attendance of chat sessions is mandatory. There is 5% grade for chat room participation.

CHAT ROOM SESSION: Chat room session is scheduled 5-7 PM every Tuesday except for public holidays.

GRADING:

Homework/Quizzes:	30%
Chat room attendance	5%
Mid-term Examination:	30%
Final Examination	35%
Total	100%

Students are responsible for satisfying all academic objectives as defined by the instructor. Absences count from the first class meeting.

A	94 – 100%
A-	90 – 93.9%
B+	87 – 89.9%
B	83 – 86.9%
B-	80 – 82.9%
C+	77 – 79.9%
C	73 – 76.9%
C-	70 – 72.9%
D+	67 – 69.9%
D	63 – 66.9%
D-	60 – 62.9%
E	< 60%

ASSIGNMENTS/ EXAMS/PROJECTS: Nanotechnology is one of the rapidly-developing frontiers with application in many fields including food, agriculture /LECTURES and environment. This course involves new concepts, principles, application, and measurements. It is important that the students have a good understanding of the concepts and principles. Therefore, in addition to lectures, the students will be also provided with supplementary course materials to read and homework to do at the end of each chapter. The students are required to submit homework report timely in order to obtain scores. The mid-term examination is designed to check the study progresses of each student so that some adjustment can be made based on student's performance. All the students are required to take final examination, which is used to indicate the learning efficacy and accomplishments of each student.

TEXTBOOK/REFERENCES:

No textbook is required. Reference books, journal articles, and related information links are provided on course website and in disk. Some examples of general readings that support several topics are listed as follows:

Reference Books:

COURSE CHAPTERS

Nanotechnology in Agriculture, Food and Environment

Module I Basic concepts and principles of nanotechnology

- Chapter 1 Fundamentals of Nanoscience and Nanotechnology
- 2 Nanoscale Materials: Definition and Properties
- 3 Manufacturing and Characterization of Nanoparticles
- 4 Natural Nanoparticles and Their Role in Soil and Water Quality

Module II Nanotechnology Applications

- 5 Nanotechnology Application in Agriculture
- 6 Nanotechnology Application in Food Sciences
- 7 Nanotechnology Application in the Environment

Module III Behavior, environmental toxicology and regulations of nanoparticle

- 8 Environmental Fate and Transport of Engineered Nanoparticles
- 9 Environmental Toxicology of Engineered Nanoparticles
- 10 Environmental Regulation of Engineered Nanomaterials

Module IV Smart nano-delivery systems

- 11 Smart Nanoscale Systems for Targeted Delivery of Drugs, Nutrients and Pesticides

Teaching schedule*

Week	Topics covered	Lectures/reading materials/assignments
1	Introduction/ historic development and fundamentals of nanoscience and nanotechnology	Lecture 1/Chapter 1 Reading materials Assignment 1
2	Nanoscale materials: definition and properties	Lecture 2/Chapter 2 Reading materials Assignment 2

3	Manufacturing and characterization of nanoparticles	Lecture 3/Chapter 3 Reading materials Assignment 3
4	Natural nanoparticles and their role in soil and water quality	Lecture 4/Chapter 4 Reading materials
5	Nanotechnology application in agriculture I & II	Lectures 5/Chapters 5 Reading materials Assignment 5
6	Nanotechnology application in food sciences	Lecture 6/Chapter 6 Reading materials Assignment 5
7		Spring break
8	Nanotechnology application in the environment	Lecture 7/Chapter 7 Reading materials Assignment 6
9	Course review	Mid-term exam
10	Environmental fate and transport of engineered nanomaterials	Lecture 8/Chapter 8 Reading materials Assignment 7
11	Environmental toxicology of engineered nanoparticles	Lecture 9/Chapter 9 Reading materials Assignment 8
12	Environmental regulation of engineered nanomaterial	Lecture 10/Chapter 10 Reading materials
13	Smart Nanoscale Systems for Targeted Delivery of Drugs, Nutrients and Pesticides	Lecture 11/Chapter 11 Reading materials
14-15	Course review	
16	Final exam	

* Dates for topics or exams are subject to change.

GRADES AND GRADE POINTS: For information on current UF policies for assigning grade points, see <https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

ABSENCES AND MAKE-UP WORK: Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies that can be found at: <https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>.

ACADEMIC HONESTY: As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.” You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment."

It is assumed that you will complete all work independently in each course unless the instructor provides explicit permission for you to collaborate on course tasks (e.g. assignments, papers, quizzes,

exams). Furthermore, as part of your obligation to uphold the Honor Code, you should report any condition that facilitates academic misconduct to appropriate personnel. It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For more information regarding the Student Honor Code, please see: <http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code>.

SOFTWARE USE: All faculty, staff, and students of the University of Florida are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

CAMPUS RESOURCES:

Health and Wellness

U Matter, We Care:

If you or a friend is in distress, please contact umatter@ufl.edu or 352 392-1575 so that a team member can reach out to the student.

Counseling and Wellness Center:

<http://www.counseling.ufl.edu/cwc/Default.aspx>, 392-1575;

Sexual Assault Recovery Services (SARS)
Student Health Care Center, 392-1161.

University Police Department, 392-1111 (or 9-1-1 for emergencies).

Student Complaints Campus: https://www.dso.ufl.edu/documents/UF_Complaints_policy.pdf

On-Line Students Complaints: <http://www.distance.ufl.edu/student-complaint-process>

STUDENTS WITH DISABILITIES: The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues. Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

ONLINE COURSE EVALUATION: Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results/>.

STUDENT COMPLAINTS: Each online distance learning program has a process for, and will make every attempt to resolve, student complaints within its academic and administrative departments at the program level. See <http://distance.ufl.edu/student-complaints> for more details.
